

Zoran Krstić

Frontend Developer | Full-Stack with Headless/BaaS Architecture

hello@zkrstic.dev | +381652088283 | Serbia | LinkedIn: zorankrstic | GitHub: krsticzoran

Portfolio: zkrstic.dev

Frontend-focused developer with full-stack capabilities, building scalable web applications using Next.js, React, and TypeScript, backed by Strapi, Supabase, and Prisma. Delivered 15+ production projects for international clients and agencies with a consistent focus on performance, accessibility, and SEO translating complex designs into fast, maintainable, pixel-perfect interfaces.

Projects

RankinWorld – Country Data Comparison Platform – Client Project (Upwork) 2026

Data-driven country comparison platform with multi-layer caching architecture and Strapi-powered blog

- Built with **Next.js**, **TypeScript**, **Prisma**, **MariaDB** and **Strapi CMS**
- Improved mobile PageSpeed performance score from 41 to 97 through caching and rendering optimizations
- **Live:** rankinworld.com

Miriam's Joy – Artisan Showcase Site – Client Project (Upwork) 2026

High-performance artisan showcase site with custom Strapi CMS, Stripe and MailerLite integration

- Built with **Next.js**, **Strapi CMS**, **Tailwind CSS**, **Stripe** and **MailerLite**
- Achieved 95+ mobile PageSpeed score while maintaining WCAG AA accessibility compliance
- **Live:** miriamsjoy.com

Lypta – SaaS Marketing Site – Agency Project 2026

High-performance marketing website for a legal-tech solution focused on law firm management.

- Engineered with **Nuxt 3**, **Vue 3**, and **Tailwind CSS** to deliver a professional, high-trust digital presence
- Developed a **Markdown-powered blog** with optimized asset loading, cinematic UI, and SEO best practices
- **Live:** lypta.org

Portage Creek Web Designs – Client Project 2025

High-performance agency website highlighting client projects and services.

- Built with **Next.js** and **Tailwind CSS**
- Achieved 95+ PageSpeed Insights score and 100/100 Lighthouse accessibility score
- **Live:** portagecreekwebdesigns.com **GitHub:** Repository

Fakturify Marketing Website – Agency Project 2025

Marketing website for a SaaS invoicing platform designed for Serbian freelancers and sole proprietors.

- Built with **Nuxt 3**, **Vue 3**, **Tailwind CSS**, and **Zod** for form validation
- Implemented contact form with honeypot spam protection and server-side API integration
- **Live:** fakturify.com

Learn Plus NGO Website – Client Project Website for a Croatian NGO organizing Erasmus+ educational programs across Europe. • Built with Next.js, TypeScript, Tailwind CSS, and Strapi CMS • Dynamic blog and content management with headless CMS architecture • Live: learn-plus.org GitHub: Repository	2025
Infiniwave – Web Design Portfolio – Client Project High-fidelity conversion of a complex Figma design into a responsive, performant portfolio website. • Executed a pixel-perfect Figma-to-HTML conversion using Vanilla JavaScript, HTML5, and CSS3 • Live: infinivave.be GitHub: Repository	2024
Basketball Coach Website – Client Project Professional website for renowned basketball coach Siniša Savović, the first trainer of NBA MVP Nikola Jokić. • Built with Next.js, SASS, and Resend API for email contact form • Live: probasketballcoach.com GitHub: Repository	2024

Work Experience

Freelance Frontend Developer Full-Stack with Headless/BaaS Architecture	April 2024 – Present
• End-to-End Delivery: Managing the full project lifecycle for international clients and agency teams from initial scoping through deployment and post-launch support. • Technical Implementation: Building complex frontend applications (React, Next.js, TypeScript) with backend integrations spanning REST APIs, Supabase, and Stripe payments. • Measurable Results: Consistently optimizing for performance and SEO, with documented improvements such as raising a client's mobile PageSpeed score from 41 to 97. • Track Record: Maintaining a 100% Job Success Rate across 10+ projects on Upwork, partnering closely with designers and backend developers on each engagement.
